## **REASONS FOR ALLOWANCE**

1. Claims 137-184 will be allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not provide for nor suggests providing for as follows:

Protection paths carrying non-worker data in the absence of a fault in the worker path;

Protection means being operative for activating the entire plurality of detours to carry the worker data upon detection of a fault in the worker path; and

Returning the worker data to a part of the worker path not affected by the fault from at least one of the plurality of detours providing an alternative to that part of the worker path not affected by the fault (see, e.g., applicant's published specification paragraph [0005]).

The closest prior art (Andersson et al. U.S. Pub. No. 2002/0004843) teaches as follows:

A system, device, and method for bypassing network changes in a communication network pre-computes recovery paths to protect various primary paths.

A fast detection mechanism is preferably used to detect network changes quickly, and communications are switched over from the primary paths to the recovery paths in order to bypass network changes (see, e.g., abstract); and

Upon detecting a network failure, the network nodes switch certain communications to one or more recovery paths in order to bypass the network failure, while communications unaffected by the network failure typically remain on the primary paths. The switch over to the recovery paths can be accomplished, for example, by removing the primary path from the forwarding table, blocking the primary path in the forwarding table, or marking the recovery path as a higher priority path than the primary path in the forwarding table (see, e.g., paragraph [0048]).

Therefore, Andersson fails to teach or suggest that activating the entire plurality of detours to carry the worker data upon detection of a fault in the worker path and returning the worker data to a part of the worker path not affected by the fault from at least one of the plurality of detours providing an alternative to that part of the worker path not affected by the fault.

For these reasons, in conjunction with the other limitations of the independent claim, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
